What would 15 - 20% pa returns look like?

Your Wealth (starting with 100,000 in Year 1)

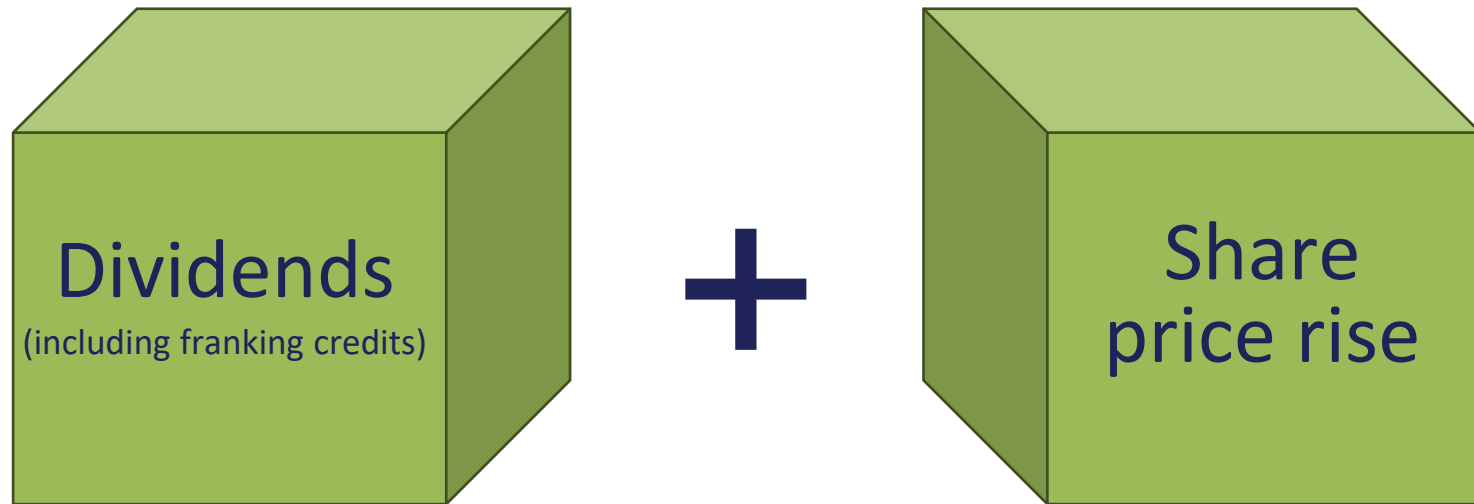

15 - 20% multiplies your wealth by:

- 4-6 times over **10 years**
- 16-38 times over **20 years!**

To achieve 15 - 20% pa returns

Where do Total Returns come from?

How can you get this combination to average 15% - 20% with low risk?

Dividends alone won't get close!

Share Price = EPS x P/E

For Share Price to rise:

Building a portfolio

How do you build a portfolio that increases per share profits (EPS) on average by (say) greater than 10%?

and, how do you buy these companies when their P/Es are well below their mean?

so that together with dividends your
TSR averages at least

15-20% ?
